21st Century Phlox

Outstanding showiness and strong hybrid vigor.

- The world's first F1 hybrid phlox
- Strong flower power all season
- Cool-season color for southern markets
- Use with pansy plantings

Blue Star

Rose Star

The premium pack/pot phlox for landscapes.

21st Century Phlox: 9 colors & 3 mixes

Phlox drummondii
Location: Full sun (6 hours or more)
Height: 10 in. (25 cm)
Spacing: 10 to 12 in. (25 to 30 cm)
Florida & Southern U.S.: October 15 to April 15
North: Spring to mid-Summer

Fast, full plants: Vigorous side branching and a uniform habit across all 9 colors makes bushy, mounded plants with strong flower power all season. Add in low maintenance and the ability to stay compact through all kinds of conditions, and 21st Century is a standout in landscapes and containers.

Winner through cool and heat: This cool season thriver excels when the temperatures are lower. When 21st Century is placed in the landscape when temperatures are cooler and allowed to establish, it will hold up very well to heat.

Favorite colors plus novel Stars: Choose popular solid and eyed varieties, or select special rose or blue star patterns for an extra eye-catching effect.

21st Century phlox is bred by Ball Horticultural Company. Ball is dedicated to providing landscape professionals with the latest information and best-performing products for the landscape. Visit **balllandscape.com** today for more Landscape Color Solutions.

Ordering Your 21st Century Phlox
Your preferred grower needs 7 to 8 weeks to produce 21st Century phlox in packs and pots.
North: Order November to December
South: Order July to August

EasyScape® Plantable Pots Save Time & Labor, Reduce Planting Waste

- Plant up to 30% faster – go straight from tray to ground.
- Less plastic means less waste for faster clean-up – stack your trays and go.
- No "depotting," no torn roots, less plant damage, no cut fingers.
- Certified EasyScape growers use organic-based fertilizer to get plants off to a healthy, sustainable start.
